Sex: Male | Date of birth: 14/11/2003 | Nationality: Indian

WORK EXPERIENCE

July'25- Present day

Trainee - Enterprise Automation Developer

Xalta Technologies

- Utilized UiPath's REFramework to build scalable and robust automations, incorporating best practices for logging, exception handling, and application initialization.
- Developed and tested attended and unattended bots using UiPath Studio and Automation 360 (A360) to automate rule-based processes like data extraction from websites, PDF data entry, and file management.
- Performed unit testing and debugging on both UiPath and A360 bots, using debugging tools and error handling (try-catch blocks) to identify and resolve defects, ensuring process stability.
- Managed and scheduled automation jobs using UiPath Orchestrator and A360 Control Room, monitoring bot performance and handling basic environment configurations

Aug'23- Sep'23

ML Intern

Suvidha Foundation (Remote)

- Used Python for Development for the ML models Libraries
- Used were SciKitLearn, Matplotlib, Pandas, NLTK
- Applied concepts of Data cleaning, Feature Engineering and NLP
- Developed a text summariser, which summarised huge news articles

EDUCATION AND TRAINING

Nov' 21 – Jun' 25

Bachelor of Engineering in Computer Engineering

Dr. D. Y. Patil Institute of Technology, Pimpri, Pune (Savitribai Phule Pune University) India.

 <https://engg.dypvp.edu.in/>

CGPA: 9.55

Jun'2020 – May2021

Class 12th

Maharashtra State Board of Secondary and Higher Secondary Education

Percentage: 94%

March '2019

Class 10th

Maharashtra State Board of Secondary and Higher Secondary Education

Percentage: 89.8%

PERSONAL SKILLS

Mother tongue(s)

Marathi

Other language(s)	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production	
English	Proficient	Proficient	Proficient	Proficient	Proficient
IELTS Band: 7.5 CEFR Level: C1					
German(Learning)	Beginner	Beginner	Beginner	Beginner	Beginner
Hindi	Proficient	Proficient	Proficient	Proficient	Proficient

Test Scores ▪ GRE SCORE: 317 / 340. Verbal:155/170 Quantitative:162/170

Communication skills ▪ Strong communication skills developed through leadership roles as Senior Event Manager at ACES and Event Head of Acunetix, involving event planning, team coordination, public interaction, and delegation.

Organisational / managerial skills ▪ Leadership and organisational skills demonstrated as Senior Event Manager at ACES and Event Head of Acunetix, where I managed event logistics, delegated tasks, coordinated teams, and ensured smooth execution of large-scale technical events.
▪ Time management
▪ Leadership: Led the Hacktoberfest (an online virtual event where Open Source contributions are promoted among fellow developers) fostering collaboration among over 40 contributors in the department

Job-related skills ▪ Proficient in data preprocessing and model evaluation techniques, gained through hands-on experience developing ML models during internships and solo projects such as Fake News Detection and Diabetes Prediction

Computer skills ▪ Languages: C, Java, C++, Python, Javascript.
▪ Web Technologies: HTML5, CSS3, PHP, Bootstrap, ExpressJs, Nodejs, ReactJs, Tailwind
▪ Database: MySQL, MongoDB

Other skills ▪ Operating Systems ,Machine Learning, NLP, Feature Extraction
▪ Data Analysis, Computer Networking, Deep Learning, Data Structures, Algorithms

ADDITIONAL INFORMATION

Presentations ▪ Presented seminar on Introduction to Quantum Computing as a part of Seminar towards fulfilment of degree in December 2023 at the Dr. D. Y. Patil Institute of Technology.

Certifications/Courses ▪ Artificial Intelligence Primer Certification – August 2023 | Platform: Infosys Springboard
▪ Introduction to Artificial Intelligence – July, 2023 | Platform: Infosys Springboard
▪ Introduction to Data Science – July , 2023 | Platform: Infosys Springboard
▪ Introduction to Deep Learning – August, 2023 | Platform: Infosys Springboard
▪ Introduction to Natural Language Processing – July, 2023 | Platform: Infosys Springboard
▪ Computer Vision 101 –August, 2023 | Platform: Infosys Springboard
▪ Introduction to Robotic Process Automation – August, 2023 | Platform: Infosys Springboard
▪ Associate Automation Developer – September, 2025 | Platform: UIPath

Projects Academic projects

▪ **Solaris Deep Learning-Based Solar Yield Predictor**(May2025): Developed a deep learning model to predict solar energy yield from rooftop aerial imagery. Utilized convolutional neural networks for image segmentation and analysis, integrating climate and geospatial data for accurate solar potential estimation. Aimed at optimizing renewable energy planning and deployment.

Personal projects

- **Students Complaint System** (Feb 2023 – May 2023): Developed an online complaint resolution system enabling students to submit complaints and allowing administrators to manage them; implemented using HTML, CSS, EJS (templating), Node.js, Express.js, and MongoDB; responsible for backend development and database integration.
- **Farmify** (Feb 2024): Developed a deep learning-based system to detect plant leaf diseases from images; integrated the system with a large language model (LLM) to provide additional insights; applied image processing techniques and managed model training, evaluation, and validation.

Conferences

- Attended The Global Conference in Emerging Technology (GINOTECH) 2025 and presented a research paper named Solaris: Deep Learning Based Model for prediction of solar power yield On rooftop using aerial imagery

Honours and awards

- Secured Department Rank 2 in Second Year in the Department of Computer Engineering and was awarded Academic Excellence Award in the year 2023.
- Secured Department rank 3 in Third Year in the Department of Computer Engineering.
